+91 6386132874 | guptajigyasa893@gmail.com | Lucknow, Uttar Pradesh | LinkedIn: Jigyasa Guptapta

PROFESSIONAL SUMMARY

Computer Science student specializing in AI and Machine Learning with hands-on experience building full-stack applications and ML systems. Proficient in JavaScript, Python, and distributed systems concepts. Demonstrated problem-solving skills through competitive programming (100+ LeetCode problems), open-source contributions (GSSoC 2024), and hackathon participation. Seeking internship opportunity to contribute to Google's core products and infrastructure.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, C, HTML, CSS, SQL

Web Development: React.js, Node.js, Express.js, REST APIs, MERN Stack

Machine Learning & AI: Python, Scikit-learn, TensorFlow, Pandas, NumPy, OpenCV

Databases & Tools: MongoDB, MySQL, Git, GitHub, VS Code, Postman

Problem Solving: Data Structures, Algorithms, System Design, Code Architecture

EXPERIENCE

Software Intern | CodeMirror (Remote)

December 2025

- Contributed to web editor development of CodeMirror, a JavaScript code editor library used in production applications
- Executed testing and quality assurance for editor features, identifying and documenting bugs and edge cases
- Participated in code reviews with senior engineers, learning architectural patterns and best practices
- Improved code documentation and developer experience for the open-source community

Full Stack Developer Intern | SRDT Pvt. Ltd.

May 2026 – June 2026

- Built AI Codebase Navigator, a full-stack MERN application integrating GitHub API and Gemini AI for code analysis
- Designed and implemented responsive React frontend handling real-time API calls and dependency graph visualization
- Developed Node.js and Express.js backend services with RESTful APIs for authentication and data processing
- Integrated MongoDB for scalable data storage and retrieval with optimized database queries

Machine Learning Intern | SRDT Pvt. Ltd.

June 2025 – July 2025

- Developed predictive model for stock price forecasting using Logistic Regression and Random Forest algorithms
- Implemented data preprocessing pipeline with Pandas and NumPy for feature engineering and normalization
- Deployed Flask web application with ML model inference, real-time predictions, and performance metrics
- Recognized as Best Performer for technical excellence, reliable execution, and code quality

PROJECTS

AI Codebase Navigator | React, Node.js, Express, MongoDB, Gemini API

- Built full-stack web application enabling intelligent GitHub repository analysis through AI integration
- Implemented LLM-powered code summarization, dependency analysis, and interactive chat for code understanding

Stock Price Prediction System | Python, Flask, Scikit-learn, Pandas

- Developed machine learning pipeline for time-series forecasting with Logistic Regression and Random Forest
- Deployed Flask application with model inference, data visualization, and real-time prediction endpoints

Tiffin Service Platform | MERN Stack, MongoDB, Stripe API

- Designed multi-tenant marketplace platform with user authentication, order management, and payment processing
- Implemented role-based access control and dashboards for customers, vendors, and administrators

Kolam Design Analyzer | Python, OpenCV, Computer Vision

- Built computer vision system for pattern recognition and symmetry detection in images
- Implemented OpenCV algorithms for image processing, analysis, and real-time visualization

Blog Application | MERN Stack

- Developed full-featured blog platform with user authentication, CRUD operations, and content management
- Implemented responsive design ensuring optimal user experience across all devices

Todo Application | MERN Stack

- Built task management application with user authentication, task CRUD, and persistent data storage

ACHIEVEMENTS & LEADERSHIP

- Competitive Programmer: Solved 100+ Data Structures and Algorithms problems on LeetCode
- Open Source Contributor: GirlScript Summer of Code (GSSoC) 2024 with 100+ commits to production codebases
- Hackathon Leader: Managed 4-5 member team in problem-solving hackathon with recognized technical contribution
- Smart India Hackathon (SIH) Participant: Advanced through college screening rounds
- Event Organizer: Coordinated multiple college events, fests, and technical initiatives
- Public Speaker: Delivered 5-10 technical presentations at college seminars
- Technical Leadership: PR Head, GeeksforGeeks Student Chapter; Member, Computer Society of India
- NCC Cadet (67 UP Battalion): Attained Corporal rank; National-Level Camp Participant

EDUCATION

Bachelor of Technology, Computer Science & Engineering

Specialization: Artificial Intelligence & Machine Learning | CGPA: 7.3/10 | Expected Graduation: 2027

Shri Ramswaroop Memorial College of Engineering & Management, Lucknow
